

Troll® Bridge™

Modular Cart System

**NEW
PRODUCT**

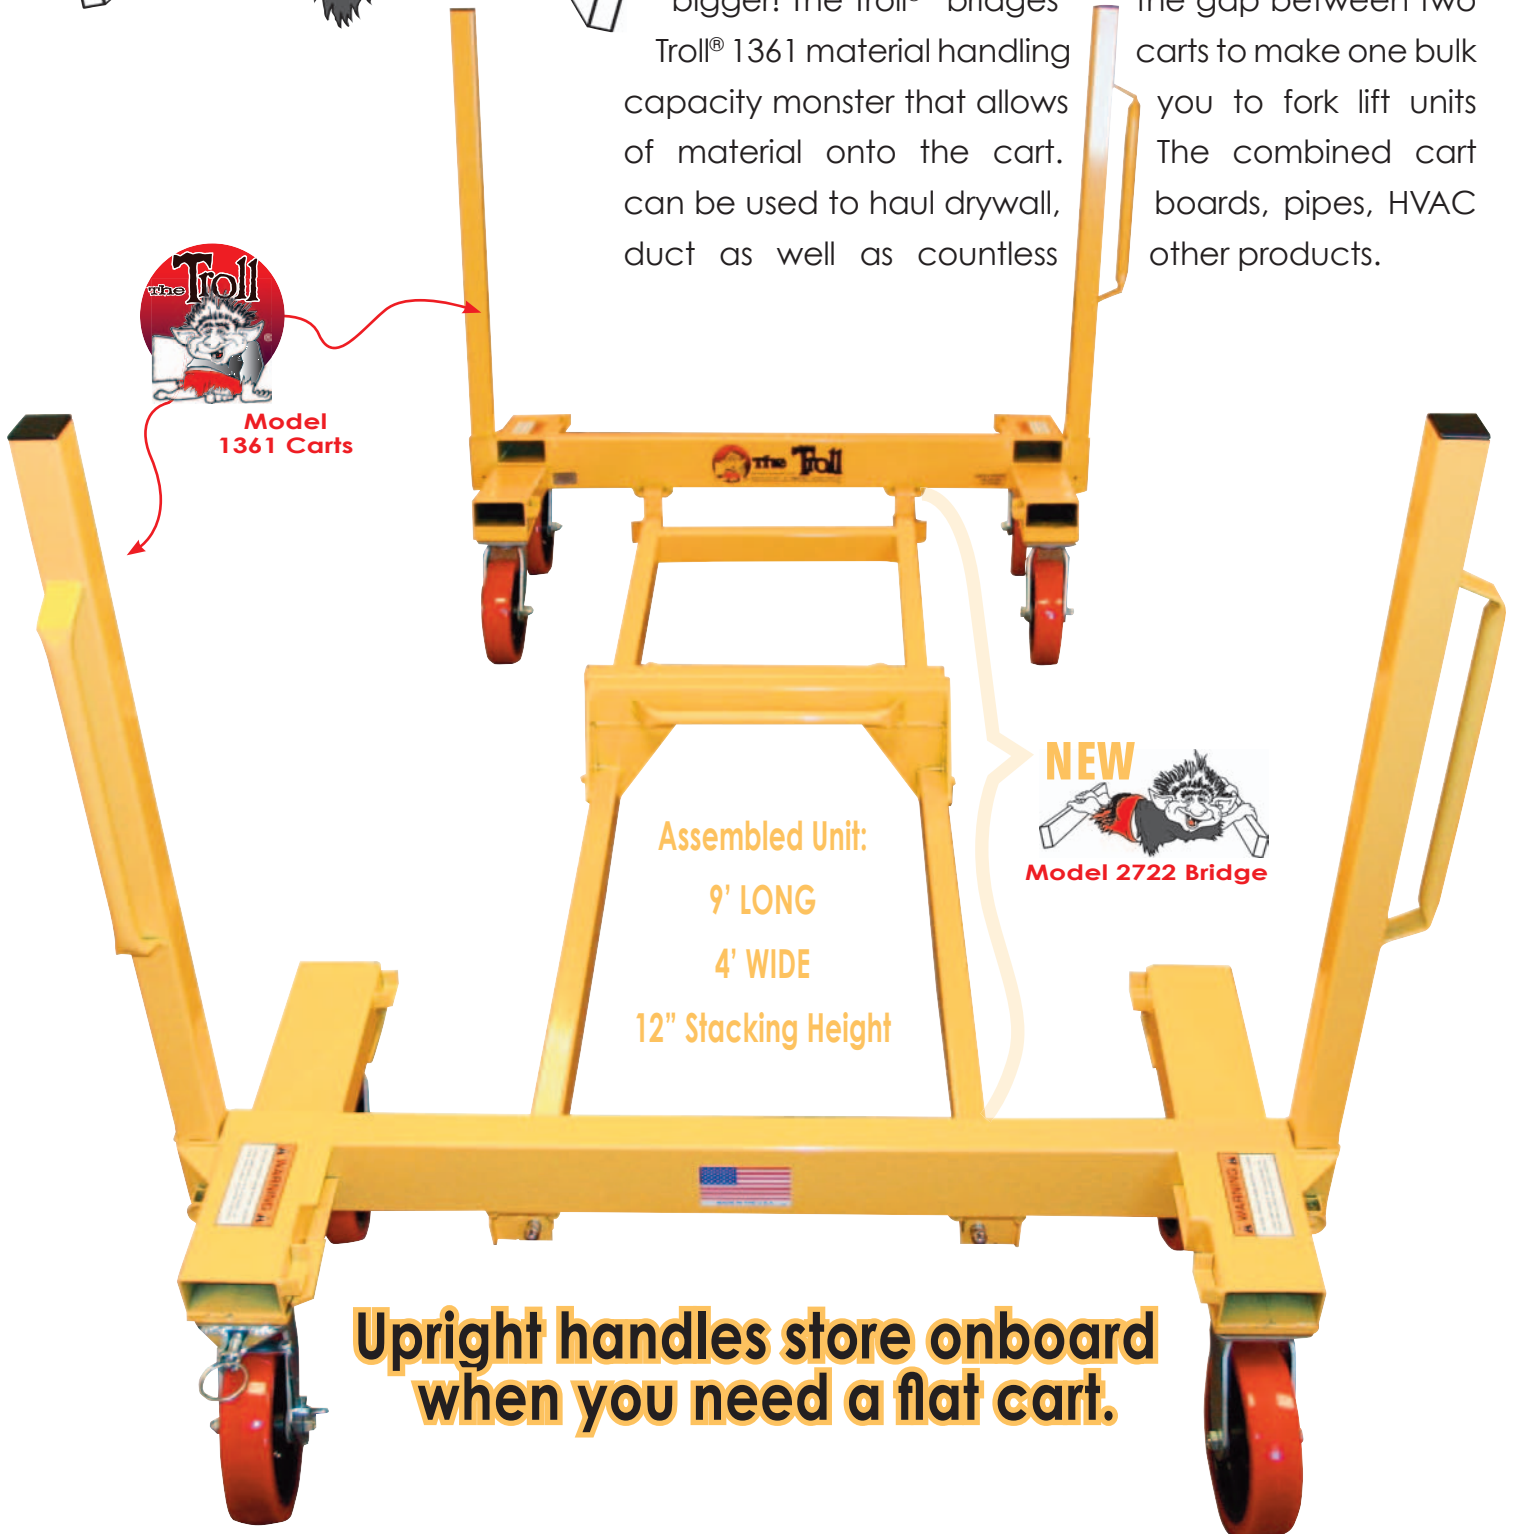

In an on going effort to make a drywall cart more than just a drywall cart, Telpro Inc. introduces the Troll® Bridge.

The Troll® Model 1361 just got bigger- a whole lot bigger! The Troll® "bridges" the gap between two Troll® 1361 material handling carts to make one bulk capacity monster that allows you to fork lift units of material onto the cart. The combined cart can be used to haul drywall, duct as well as countless other products.

Model 1361 Carts

Model 2722 Bridge

Assembled Unit:

9' LONG

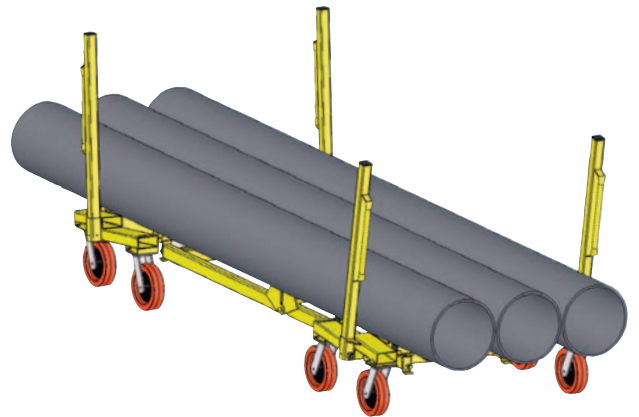

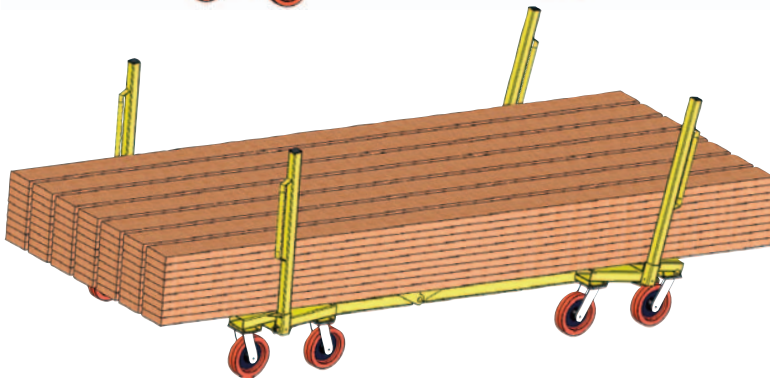

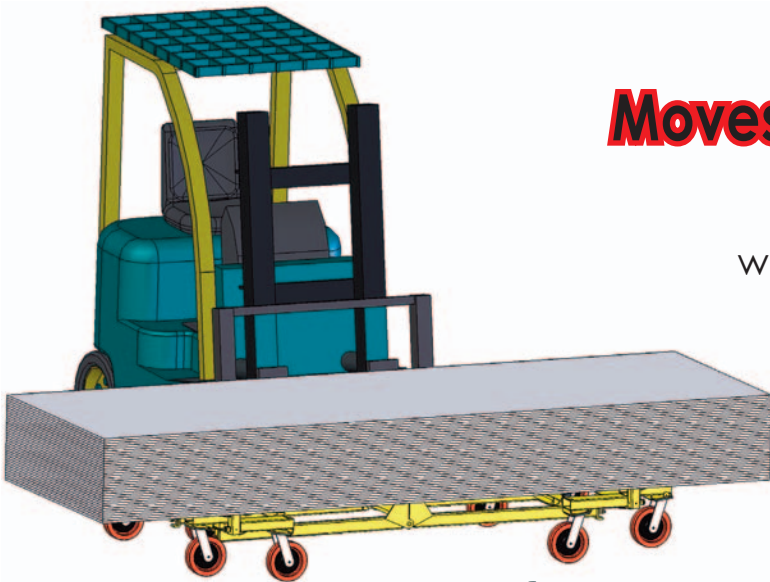

4' WIDE

12" Stacking Height

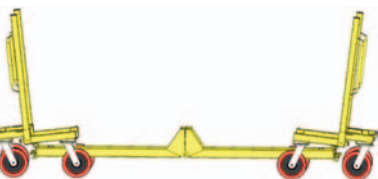

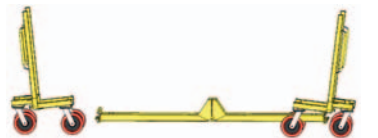

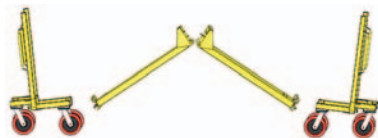

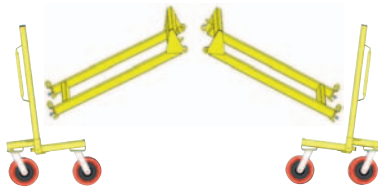

Upright handles store onboard when you need a flat cart.

Moves more than just drywall!

A huge capacity cart is needed when moving awkward or oversized material around the worksite. The Troll® Bridge can handle it. Stack the cart by hand or by forklift.

Assembly is easy:

Troll® Bridge™
